

Ontech GSM

Control remotely and alert over GSM network

With **Ontech GSM Mini 9009** you can simply remotely control radiators, alarm horns, pumps or other electrical equipment in your summer house, your working place or other locations.

Just plug in your equipment in **Ontech 9009** and where ever you are you can remotely control it.

Ontech 9009 is also equipped with two alarm inputs and it alerts you with SMS. There is also a temperature watch.

You can use all kind of SIM cards!

Ontech Relay 9010 is an optional unit that is controlled by **Ontech 9009** with short range radio. Up to 7 extra units can be connected and individually controlled by **Ontech 9009**. Of course the extra units have two alarm inputs each.
